**Or call Dorinda at 703-898-6459**

Have you had a hunch or a dream that came true? Heard your name called (and nobody was there)? Have you seen a loved one who passed on? Or felt someone looking at you? These are perceptions beyond the 5 physical senses. You can see without eyes, hear without ears, feel without touching, and move without effort...Paranormal abilities are both innate and possible to expand within us. These perceptions are called "gifts of the spirit" in scriptures; and successful entrepreneurs, artists and even scientists have made valuable use of their "sixth sense."

Now, you can explore your "mystical gifts" in four intensive classes during a weekend. You will understand and experience how you can recognize and make each of them practical in your life. You will become acquainted with the balanced and unbalanced qualities that can be expressed through each gift; and how you can clarify your plans, inner organization and communication within yourself and with others. You will regroup your inner motivation and how to tap it for greater fulfillment. And you will see how unwrapping the gifts within offers you full color & high definition living!
